

Joud Alharbi

Backend Software Engineer | AI Engineer | Joudkzn@gmail.com | 0539394738 | [Linkedin](#) | [Github](#) | [portfolio](#)

SUMMARY

Fresh computer science specializing in Artificial Intelligence, with hands-on software engineering experience building production-grade systems, from backend API design and database architecture to AI agent integration and deployment. Proficient in Python, FastAPI, LangChain, CrewAI, OpenAI API, PostgreSQL, and Docker. Passionate about engineering scalable backend systems with embedded AI capabilities.

EDUCATION

Bachelor of Computer Science – Qassim University, Grade: Excellent with Honours

Jun 2026

RELEVANT EXPERIENCE

AI Agent Developer Trainee – QassimTech | Summer Training Program

Jun 2025 – Aug 2025

- Completed hands-on training in AI agent development and automation using n8n, CrewAI, Streamlit, JavaScript, and Supabase.
- Developed AqarMind, an AI-powered real estate search platform using OpenAI embeddings, semantic search, multi-agent orchestration, JavaScript, and Supabase, enabling natural-language property discovery through AI agents.
- Supported testing, deployment, and optimization of AI-driven solutions, and was recognized for commitment, diligence, and outstanding performance.

PROJECTS

WaslTech (FastAPI, Flutter, POS Integration, API Development)-Graduation project

Jan 2026-Present

Developed a full-stack digital invoicing platform using Flutter, FastAPI, PostgreSQL, Docker, and POS integrations to automate receipt processing and ensure ZATCA compliance.

PlusCx (FastAPI, LangGraph, RAG, ChromaDB, React, WebSocket)

Jun 2026

Developed an AI-powered customer support platform featuring RAG-based knowledge retrieval, LangGraph agent workflows, real-time voice communication through WebSocket, and a React analytics dashboard.

Drug Word Classification in Handwritten Prescriptions (Deep Learning, Computer Vision)

Nov 2025

Built a deep learning-based handwritten prescription classifier using ResNet50, EfficientNetB0, and CNN architectures, achieving 77.44% accuracy and deploying inference using Streamlit.

Fraud Transaction Detection (Machine Learning)

Apr 2024

Built a machine learning-based fraud detection system for identifying suspicious transaction patterns and reducing financial risk.

VOLUNTEERING EXPERIENCE

AI Team Member – Google Developer Groups

Jan 2025 – Jun 2026

- Delivered AI workshops for 400+ students on AI fundamentals, prompt engineering, AI agents, n8n, and automation.
- Authored AI educational content and supported workshop quality, team initiatives, and community engagement.

LICENSES & CERTIFICATIONS

McKinsey Forward Program – McKinsey.org

2026

Machine Learning Bootcamp – SDAIA

2024

Generative Artificial Intelligence - IBM

2024

AWS cloud practitioner – SDA

2024

Python Specialization Certificates - University of Michigan

2023

SKILLS

Technical Skills:

- AI & Machine Learning:** Python, TensorFlow, Keras, Scikit-learn, Pandas, NumPy, OpenCV, NLP, Computer Vision
- Generative AI & Agents:** OpenAI API, LangChain, CrewAI, AI Agents, Prompt Engineering, Embeddings, Semantic Search
- Backend & Full-Stack:** FastAPI, Django, ASP.NET, Flutter, React, PostgreSQL, SQLAlchemy, Supabase, Docker, REST APIs
- Programming Languages:** Python, JavaScript, Dart, Java, C++, C#
- Tools & Platforms:** n8n, Streamlit, Git, Power BI, AWS, Figma

Soft Skills:

Problem Solving, Attention to Details, Communication, Adaptability, Presentation Skills, Team Management, Mentorship

Languages: English – Arabic
